Need...!

As we know that the population is increased & also traffic is main problem of day to day life. Suppose we are going to shopping so after shopping our product the bill is provided by online as then it is easy for us & also shopkeeper.

Solution

Creating a Grocery Billing Android Application might solve some issues.

What is billing software for a grocery shop?

Creating and managing invoices is now just a click away with the help of grocery store software, BUSY. Keep a record of your business data and manage cash flow without any error by using this software. Eliminate manual efforts and make grocery billing accurate while reducing customer queues. BUSY is the best supermarket billing software designed for improving customer experience and simplifying the billing operations of the grocery store or supermarket.

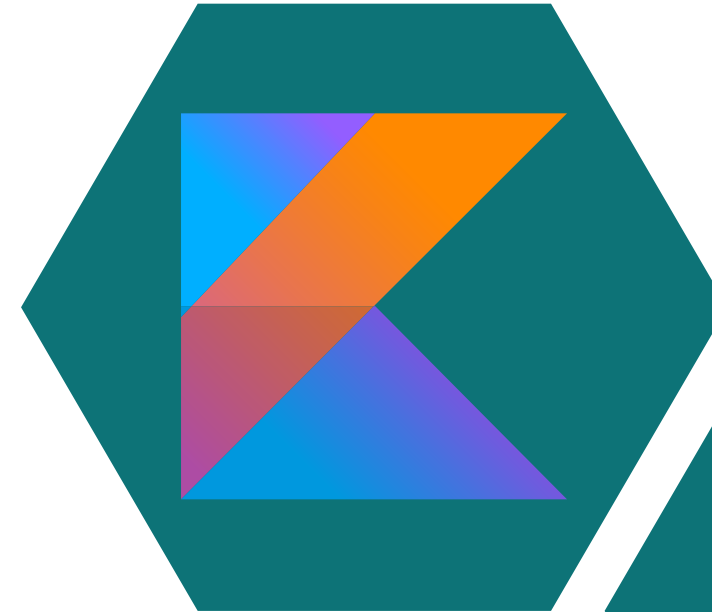

Why Use Grocery Billing Software?

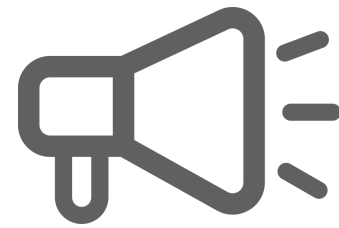

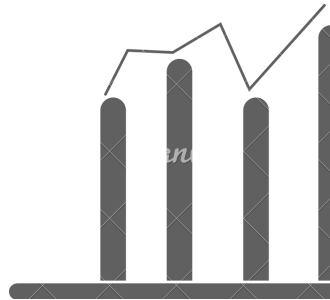

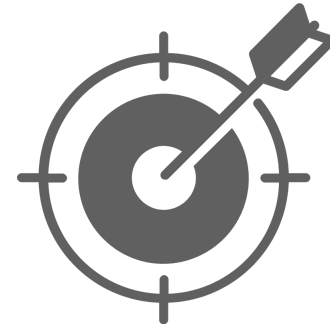

Organize your billing tasks and improve efficiency of operations of grocery store by using BUSY, the trusted supermarket billing system. The fast, simple and easily accessible interface of this software enables you to execute billing operations with ease. Simplify your accounting & other billing system of grocery store and serve customers with quick solution.

Technology

- Front-End
- Back-End
- Database

Advantage

The Application is developed with Regional Language Marathi so that will make it usable by the un-educated user to.

Conclusion

This application will be mainly used for business purpose like at malls, supermarket to generate bills and stock reports.

Future Work

In the future the customers can place their orders by self online more efficiently only at their clicks.
